ABOUT ME

Motivated career shifter with a background in CC&B Technical Architect and CC&B Functional Testing and a strong passion for front-end development. Seeking to leverage my skills and experiences in frontend development, and my ability to adapt to new environments and technologies.

SKILLS

- Proficient in HTML5, CSS3, JS & ES6, and modern frontend frameworks (React, Bootstrap)
- Experience with preprocessing languages (SASS/SCSS)
- Knowledge of backend technologies (Node.js, Express.js, PostgreSQL, Firebase)
- Ability to learn new technologies quickly and solve complex problems

EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER

Accenture Inc. 2020 - Present

CC&B TECHNICAL ARCHITECT

- Managing two clustered, high-availability environments through a UNIX server and WebLogic console
- Providing ad and user groups
- Carrying out patching and deployment activities
- Transactional data migration and config migration using the Meridian Tool
- Code migration through a Unix server
- TPW management and running F1-LDAP sync jobs through a UNIX server
- Analyzing and extracting server logs

CC&B FUNCTIONAL TESTER

- Analyze and execute test scripts, conditions, data, and expected results for one or more test plans.
- Record problems and issues in a collaborative tracker tool
- Work with the developer team to resolve any issues that arise out of the testing process
- Validate product fixes
